

QUALITY INSTITUTE MEMBERSHIP GUIDE

We bring together our members and trusted partners to improve the safety, quality, and affordability of health care for everyone through policy change, quality improvement, and community health initiatives. For over 25 years the Quality Institute has been a recognized thought leader, educator, translator, and convener for health policy and improvement in New Jersey, as well as nationally.

OUR BOARD OF DIRECTORS

Board Chair Suzanne M. Miller, PhD

Board Treasurer Donald Bryan, JD
Board Vice Chair Fred M. Jacobs, MD, JD
Andrea Martinez-Mejia, MPA, MA
Ashish Parikh, MD
Gary Mann
Heather Howard, JD

John Leyman
Kemi Alli, MD
Linda Schwimmer, JD
Linda Sloan Locke, CNM, MPH, LSW, FACNM
Mary Ann Christopher, MSN, RN, FAAN
Mary Campagnolo, MD, MBA
Robert Andrews, JD

OUR CURRENT WORK

POLICY

- **NJ Integrated Care for Kids (NJ InCK)**: NJ InCK is a model of pediatric care that emphasizes community-based case management and screening for children and families who are at the highest risk for health complexity. We co-lead this CMMI model with [Hackensack Meridian Health](#) and [Visiting Nurse Association Health Group](#).
- **Maternity**: We are actively working to improve the safety and quality of maternal health in New Jersey. Current work includes advancing Nurture NJ's strategic plan through our [Maternity Action Plan \(MAP\)](#) which focuses on data collection, supporting the workforce, reforming payment, and improving social supports. Our policy team works to promote the long-term sustainability of innovative models like [HealthySteps](#), [CenteringPregnancy](#) and [CenteringParenting](#), including understanding current payment structure and building a payment strategy that would allow for program growth across the state. Our maternity work is supported by [The Robert Wood Johnson Foundation](#), [The Burke Foundation](#), and [NJAAP](#).
- **Findings and Recommendations to Support Advanced Primary Care**: We were engaged by the New Jersey Department of Human

Services to conduct a market scan of primary care, including alternative payment models ("APM") currently in use in New Jersey. The work included convening a workgroup of stakeholders and subject matter experts to inform the market scan and develop recommendations to support Advanced Primary Care in New Jersey.

- **Essential Jobs Essential Care Coalition** - Building upon the work of our [Guidance Document to Recruit, Train, and Retain a Resilient and Diverse Health Care Workforce for New Jersey](#), the Quality Institute has joined the Essential Jobs Essential Care (EJEC) Coalition to improve the recruitment, training, and retention of direct care workers, such as home health aides and certified nursing assistants, in New Jersey. This work is supported by [The Taub Foundation](#).

QUALITY

- **TeamBirth NJ**: The Quality Institute with [Ariadne Labs](#) launched a shared decision-making initiative, [TeamBirth](#), in New Jersey. TeamBirth works to improve maternal and infant outcomes and inequities that are the result of breakdowns in teamwork and communication in the delivery system. This

work is supported by New Jersey Department of Health.

- [Raising the Bar](#) (RTB) for Maternal Health in New Jersey: RTB is a framework for health care systems to improve care for all birthing people and babies that defines four roles that they play as providers of care, employers, community partners, and advocates. The Quality Institute is currently working with two hospitals in New Jersey to apply RTB strategies. This work is supported by the [Robert Wood Johnson Foundation](#).
- [The Leapfrog Group](#): The Quality Institute is the Regional Leader for The Leapfrog Group in New Jersey and New York. We provide support to hospitals and Ambulatory Surgical Centers (ASC) to achieve the highest participation rate in the country in [The Leapfrog Group’s annual Hospital and ASC Survey](#).
- [Quality Briefings](#): The Quality Institute releases regular Quality Briefings to advance quality improvement work. Recent briefings have focused on screening and testing and hand hygiene best practices.

COMMUNITY HEALTH

- [Mayors Wellness Campaign \(MWC\)](#): MWC is a statewide community health initiative which provides communities with technical assistance for collecting local data, and prioritizing health-related needs, planning and implementing programs to address those needs, and developing evaluations. Over 430 communities across New Jersey are participating.
- [Conversation of Your Life \(COYL\)](#): COYL is a statewide community-based program focused on the value and steps for Advance Directives. COYL is a part of the MWC.
- [Mental Health Focus](#): With support from [The Horizon Foundation for New Jersey](#), we are running programs with MWCs to combat stigma around mental health and to train people in [Mental Health First Aid](#). With support from the [HealthCare Foundation of New Jersey](#) we are training doulas, community health workers, and others who support pregnant individuals, in Mental Health First Aid.
