About the Quality Institute

The Quality Institute is a nonprofit, multi-stakeholder advocate for health care quality in New Jersey.

Our mission is to improve the safety, quality, and affordability of healthcare for everyone.

The primary focus of the Quality Institute's areas of work are:

- Community Health
- Policy
- Quality Improvement

BRIGHAM HEALTH

**BRIGHAM AND
WOMEN'S HOSPITAL**

**HARVARD T.H. CHAN
SCHOOL OF PUBLIC HEALTH**

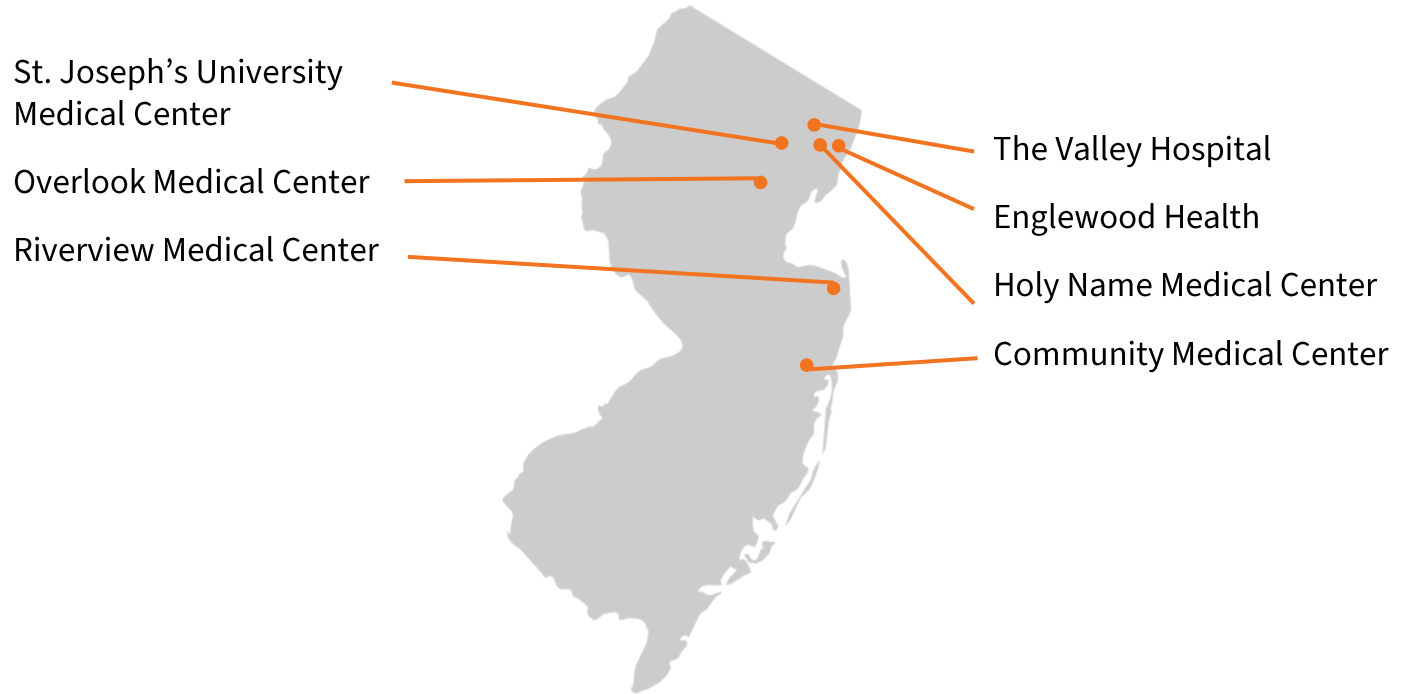

We are a joint center for health systems innovation at Brigham & Women's Hospital and the Harvard T.H. Chan School of Public Health.

DELIVERY DECISIONS INITIATIVE

**Our vision is a world in which every person
can choose to grow their family with dignity.**

TeamBirth Background

Over the past generation, giving birth in America has become less **TRUSTWORTHY**

U.S. women have the highest rate of maternal mortality among high-income countries

Black women experience 3-4x higher mortality

80% of pregnancy-related deaths may be preventable

Almost 1/3 of women in U.S. who gave birth in a hospital reported experiencing one or more types of mistreatment

Mistreatment is experienced more frequently by women of color and among those with social, economic or health challenges

Almost half (45%) of moms reported **holding back from asking questions or sharing concerns** during their pregnancy or delivery.

80–90%

of reported sentinel events are due
to failures of communication
and teamwork.

HEAR

Learn more at [cdc.gov/HearHer](https://www.cdc.gov/HearHer)

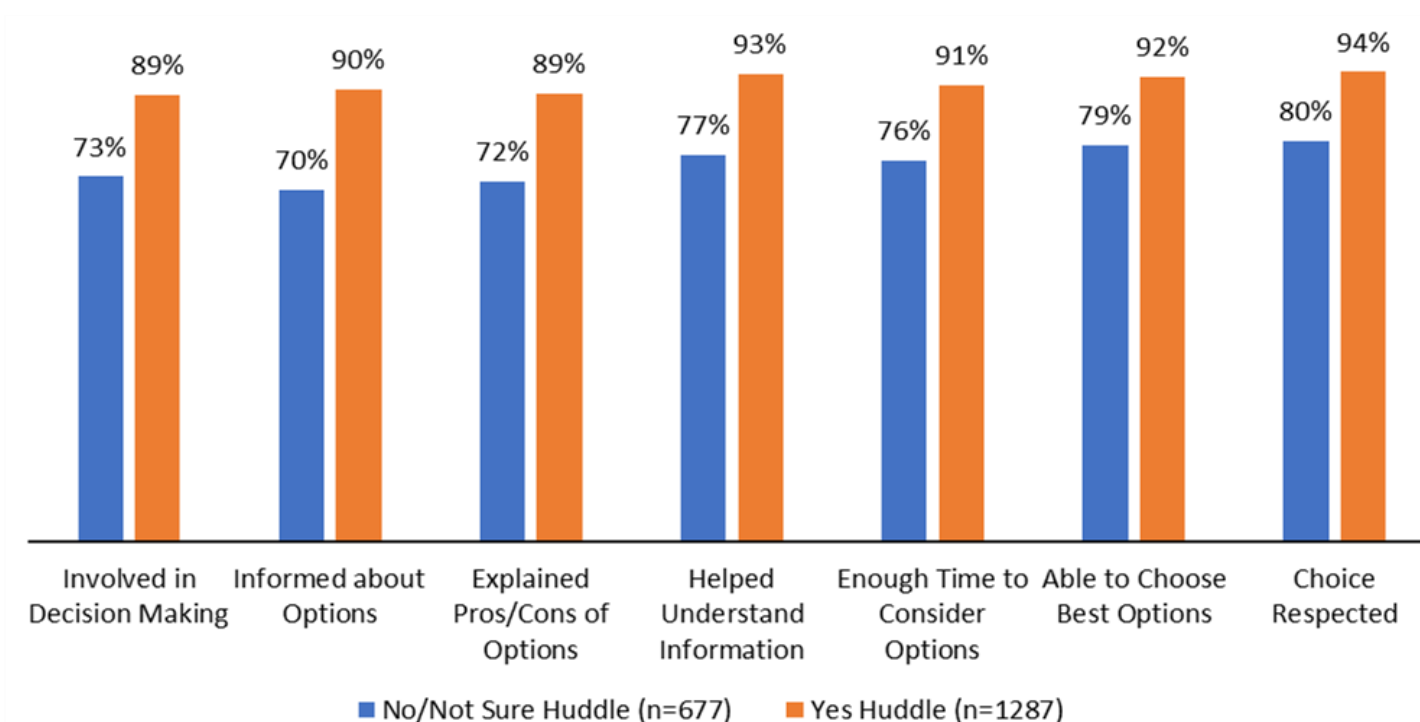

TeamBirth is a care process innovation involving a series of team huddles between the patient and their care team designed to:

- Empower each team member to contribute information
- Reliably structure communication
- Help the team arrive at shared plans together

For patients, TeamBirth invites them into the conversations and provides a structure that is easy to understand and participate in.

For clinicians, TeamBirth encourages all conversations to be had with the patient to promote effective team communication and alignment across the full team.

Patients who experienced a TeamBirth huddle during labor, report more “strongly agree” or “completely agree” for each of the MADM score items.

Patients who experienced a TeamBirth huddle during labor, have **high MADM scores across different races and ethnicities**, compared to those with no huddle.

MADM Quartiles by Race/ethnicity and Huddle Status

TeamBirth Overview

Current Communication

TeamBirth Communication

The TeamBirth solution embodies two design principles:

TEAMWORK:

Promote psychological safety and shared decision-making with the birthing person

SIMPLICITY:

Reliably communicate information across the full care team, including the birthing person

TeamBirth's components promote *four key behaviors*:

Promoting the role of each team member

Eliciting patient preferences

Distinguishing plan for patient, baby, and labor progress*

Set shared expectations for the timing of the next huddle

* Labor progress refers to the laboring uterus and cervix. Plans for progress should also be discussed in postpartum and newborn huddles.

TeamBirth **Core** Components

Critical to successful delivery of TeamBirth across the maternal health continuum

1.

STRUCTURED TEAM HUDDLES

Structured conversations that includes the birthing person and their support people

2.

SHARED PLANNING TOOL

Visual tool that structures communication and provides space to document discussions during huddles

WHEN TO HUDDLE

Door to Door TeamBirth

**Triage /
OBED**

TeamBirth sets the standard for team communication throughout every birthing journey.

There are **key moments** throughout each journey when it is essential to use TeamBirth.

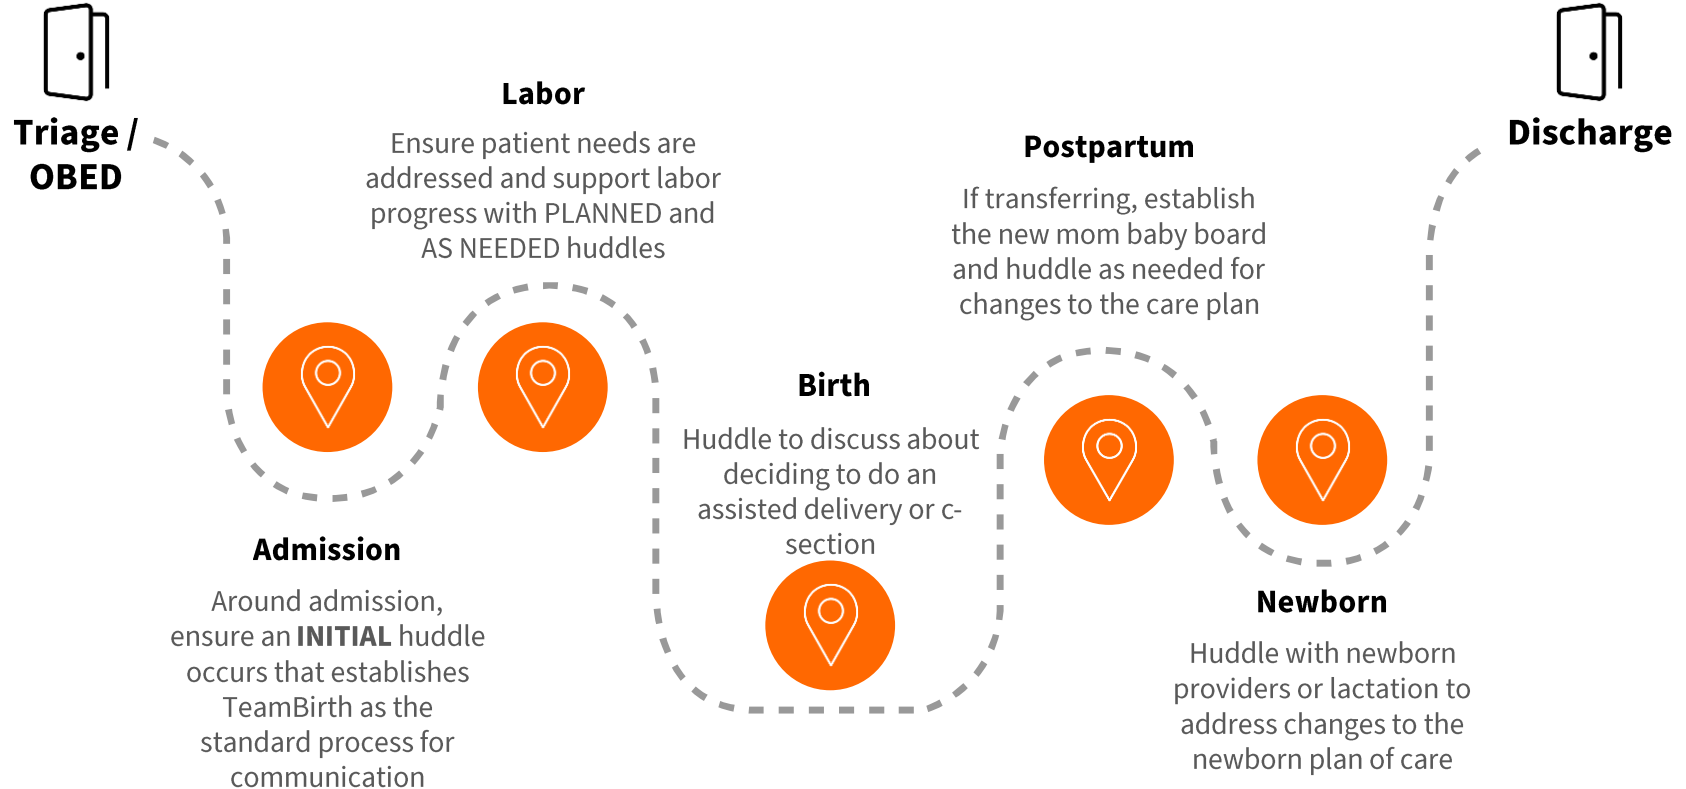

Discharge

Door to Door TeamBirth

These **key moments** describe how TeamBirth is put in practice throughout the birthing journey.

Add-On Components: DISCUSSION AND SUPPORT GUIDES

Admission Discussion Guide

Discuss the best next steps with your support person or doula, your nurse, and your provider based on how you are doing, how your baby is doing, and how your labor is progressing.

If you are in EARLY LABOR

You may benefit from
Comfort of home environment
Being active
Staying close to the hospital

If you are in ACTIVE LABOR*

You may benefit from
Admission to hospital
Monitoring
Clinical care

DISCUSS WITH YOUR TEAM
What are the **benefits** of birth at 39 weeks or more?

DISCUSS: STATUS
How am I feeling?
How is my **baby** doing?
Where am I in labor?

DISCUSS: OPTIONS
What are the **benefits** and **risks** of each option?

DISCUSS: ACTIONS
What can I do to be **more comfortable**?
Where can I go **nearby**?
What are my options for **labor support**?

Labor Support Guide

Use this guide to identify, discuss, and select options for labor support with your team. These options can benefit you, your baby, and labor progress.

What are your care goals?

What options can we try?

Birthing Person

Support labor →

- Movement:** Change positions, walk, dance or sway
- Breathing:** Take deep breaths or use relaxation methods
- Touch:** Massage, stroking, or cuddling
- Temperature:** Apply heat or cold with water or packs
- Environment:** Use light, smells, or sounds to create a comfortable space
- Drink:** Have ice chips or a glass of water
- Medications:** Start or change medications for your pain
- Other:** _____

Baby

Manage wellbeing →

- Reposition:** Lay on your side, hands and knees, lunge, squat, etc.
- Monitoring:** Change monitoring method
- Hydrate:** Drink fluids or use an IV
- Medications:** Change or stop medication for your contractions
- Other:** _____

Labor Progress

Promote progress →

- Movement:** Change positions, walk, dance or sway
- Breathing:** Take deep breaths or use relaxation methods
- Tools:** Use labor support tools, like a birthing ball
- Break Water:** Use tools to break your water
- Medications:** Change or stop medication for your contractions
- Other:** _____

Assisted Delivery Discussion Guide

Use this guide in team discussions about assisted vaginal birth or C-section. Assisting your birth with vacuum, forceps, or C-section may be appropriate if your condition meets these criteria, but discuss with your team what is best for you and your baby.

What are your reasons for considering assisted delivery?

What are the MINIMUM Conditions for assisted delivery?

Birthing Person

Request →

- You believe that assisted delivery is the best option for you after discussion with your care team

Baby

Concern for wellbeing →

- On-going slow heart rate OR
- Far away from delivery with either:
 - Repeated slow downs in heart rate that do not improve with support
 - High heart rate that does not improve with support

Slow induction →

- Either:
- Early labor (4 cm or less) for 24 hours or more
 - Medications to support contractions and waters broken for 15 hours or more

Labor Progress

Slow progress →

- No cervical change with waters broken and 6 cm or more dilated with either:
- Good contractions for 4 hours or more
 - Medications to support contractions for 6 hours or more

Prolonged pushing without progress →

- Either:
- Pushing for at least 3 hours if this is your first labor
 - Pushing for at least two hours if you have labored before

DISCUSS WITH YOUR TEAM:

What are the **benefits** and **risks** of more time in labor?
What are the **benefits** and **risks** of an assisted delivery?
What **options** can we try to support my labor? (See Labor Support Guide)

NEXT HUDDLE

TEAM

KEY BEHAVIOR: Promote the role of each team member

INTENT

To ensure all roles have valuable input in shared-decision making

To establish **psychological safety** by providing an invitation and ongoing opportunity to participate

DETAILS

Verbalize that a TeamBirth huddle is occurring

Start with the patient followed by their support people

Ensure relevant team members are included

May include additional information (e.g. here until 7 pm shift change)

Who is on the Team

The direct care team includes any support people accompanying the patient as well as the clinical team primarily responsible for patient care

Huddle Initiation - Starts with the Team

Verbalizing that a TeamBirth Huddle is taking place starts with introducing the team

Team Introductions

1. Start with the birthing person
2. Follow with their support person(s)
3. Then each clinician

Ensure all relevant team members are included based on the purpose of the Huddle:

- Doula, lactation, anesthesiology, etc

Shared Planning Tool

	NEXT HUDDLE

TEAM

Other information may be valuable to include during introductions of the team

In addition to names, consider including:

- Role or Title
- Shift times
- Relationship to birthing person
- Accessibility needs

Shared Planning Tool	
TEAM <i>Alea</i> <i>Aizpea - partner (Spanish)</i> <i>Mariana - doula</i> <i>Trisha - RN (here til 7pm)</i> <i>Dr Chien - MD (here til 7am)</i>	PLAN Me: Baby: Progress:
PREFERENCES	NEXT HUDDLE

TeamBirth Introduction

Use this opportunity to ensure the patient knows what TeamBirth is

Admission Huddles should be used to establish TeamBirth huddles as the communication process the patient will experience throughout their time at the hospital

Anytime a huddle begins confirm the patient is familiar with TeamBirth and provide any explanation so they understand what is happening and why

Key Points

- 1) TeamBirth ensures teamwork and consistent transparent communication
- 2) This process is used for all birthing patients
- 3) The purpose is to ensure you [the patient and support person] can share your preferences and needs and be a part of decision making for your care.

Psychological Safety

Including and introducing each team member sets up psychological safety

The TEAM section and key behavior facilitate:

- An environment that allows individuals to feel safe, comfortable, and supported in expressing themselves
- Mitigation of fear of negative consequences such as judgement, criticism, or punishment
- Minimizing hierarchical power dynamics inherent in healthcare

Your **ideas and experience matter**, regardless of title, position, or education

We encourage **safe communication** and creating opportunities to **speak up**

Creating Psychological Safety

01	Promote the whole team	Introduce all individuals present
02	Active listening	Maintain eye contact Consider body language Give full attention
03	Empathy and validation	Acknowledge feelings Avoid dismissing or downplaying
04	Non-judgmental attitude	Avoid assumptions and judgment Recognize and understand your biases
05	Respect for autonomy	Elicit patient preferences Engage in shared-decision making Respect their choice

Creating Psychological Safety

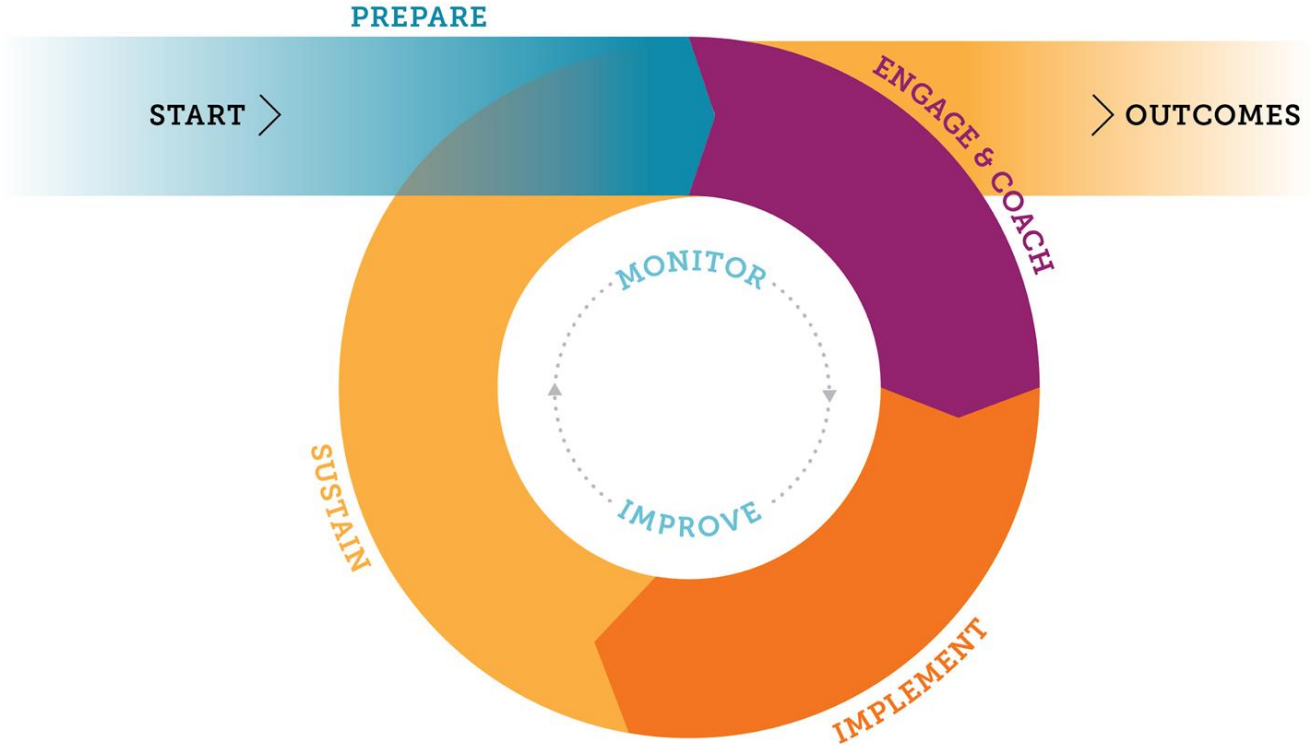

06	Clear communication	Use clear patient friendly language Customize your approach to meet their needs
07	Emotional support	Show compassion Provide comfort Demonstrate understanding
08	Cultural sensitivity	Respect and value diverse backgrounds, beliefs, and practices
09	Boundaries & confidentiality	Respect patient privacy Adhere to ethical and legal guidelines
10	Continuous learning & improvement	Seek feedback from patients and colleagues Reflect and learn from your own experiences

ENGAGE & COACH

MONITOR

Core Implementation Activity: **BUILD YOUR TEAM**

IMPROVE

USTAIN

IMPLEMENT

PREPARE PHASE

BUILD YOUR TEAM

CORE: Ensure you have the right people, structures, and processes in place to carry out implementation activities

OBJECTIVES

Establish your Implementation Team with clinical and project management roles

Establish support for TeamBirth among clinical and organizational leadership

Identify and engage Champions across care team members

ADAPT

Which roles and how many depend on your unique organization

How you bring people together and set up your project governance

BUILD YOUR TEAM

Ensure you have the right people to support your TeamBirth integration

BUILD YOUR TEAM - IMPLEMENTERS

Allocate staff critical to ensuring TeamBirth is a success

IMPLEMENTATION TEAM

The roles responsible for the planning and management of TeamBirth Implementation

The primary “doers”

- Project Lead (Nurse &/or Physician Managers or Director)
- Project Manager &/or Coordinator
- Provider Champions (OB Chair, Midwives, OBs, Pediatricians, Anesthesiologists, Neonatologists, Residents)
- Nurse Champions (Educators, L&D, Postpartum, Antepartum, Triage)
- Other Role-based Champions (Douglas, Birth Center Midwives)
- QI Specialist
- Data Analyst &/or IT Leader
- Patient Advocates/Family Representatives

BUILD YOUR TEAM - IMPLEMENTERS

Roles and Responsibilities

Project Management and Governance:

- Define shared project goals and timeline
- Provide planning, support, and resources
- Establish regular internal team check-ins
- Anticipate challenges and overcome barriers
- Engage leaders/colleagues to gain buy-in

- Build necessary data infrastructure for documentation and quality improvement
- Train and support clinicians in using the shared planning tool and having huddles
- Engage in rapid cycle feedback and other QI processes to improve the program
- Embed TeamBirth resources and training in onboarding and continuing education processes to ensure sustainability

BUILD YOUR TEAM - **IMPLEMENTATION TEAM**

Allocate leaders and staff to own
the TeamBirth Transformation

- Who will set agendas, schedule and hold accountability for timelines and tasks?
- What existing recurring meetings can be leveraged for TeamBirth conversations?
- What multidisciplinary groups or meetings exist that could help facilitate TeamBirth implementation?

BUILD YOUR TEAM - LEADERS

Advocators for TeamBirth and its implementation across departments, specialties, and disciplines

LEADERSHIP

Key advocates for
TeamBirth

Diverse stakeholders with
decision making authority
to support TeamBirth

Examples:

- Chief Medical Officer
- Chief Nursing Officer
- Chief Quality Officer
- President or Vice President of Hospital

BUILD YOUR TEAM - LEADERS

Roles and Responsibilities

- Views improving TeamBirth as an institutional priority
- Allocates financial resources for an implementation team to implement the program
- Maintains ongoing connection to other implementation leadership and helps overcome obstacles
- Engages department leaders across specialties to garner support for TeamBirth
- Publicly communicates the importance of TeamBirth's components and key behaviors
- Engages clinicians and teams personally to surface barriers to TeamBirth in practice (e.g. helps motivate and 'build the case for change')
- Attends periodic meetings with Implementation Team to monitor progress and address obstacles (e.g. steps in to address clinician reluctance)

BUILD YOUR TEAM - **LEADERS**

Establish key leadership buy-in

- Who will has decision making authority in the relevant departments and for the relevant roles?
- Who will be critical to have on board to ensure success?
- How will you hold leaders, implementers, and clinicians accountable to implementation?
- Who will be able to help you overcome organizational challenges?

BUILD YOUR TEAM - **CHAMPIONS**

Engage champions with a variety of experiences and backgrounds

CHAMPIONS

Role-based representatives for each of the direct care team members involved in Huddles

- Obstetrical providers (midwives, residents, and physicians)
- Nurse leaders & staff nurses in antepartum, labor & delivery, and postpartum, outpatient clinics, lactation
- Doulas, Childbirth educators
- Clinicians from Pediatrics, Neonatology, and Anesthesiology
- Roles across the system: social work, patient safety/experience

BUILD YOUR TEAM - CHAMPIONS

Roles and Responsibilities

- **Socialize:** Build support for TeamBirth, particularly among late adopters.
- **Train peers:** Facilitate and encourage training across roles
- **Ongoing coaching and support:** Peer-to-peer coaching of all clinicians; Observe, encourage, and give people respectful and constructive feedback as they implement TeamBirth
- **Identify barriers; Collect feedback:** Regularly check in with front-line clinicians to learn what barriers are being encountered, and share feedback with implementation team
- **Support improvement:** Discuss strategies to address barriers, celebrate successes, and overcome challenges associated with TeamBirth with the implementation team

BUILD YOUR TEAM - **CHAMPIONS**

Leverage leadership and staff to
identify valuable champions

- Which TeamBirth early adopters possess the qualities and skills to be effective champions?
 - Who will you intentionally invite to champion different parts of the project?
- How will you incentivize champion engagement?
- When and how will champions engage the Implementation Team and each other?
- When and how will champions collect and share feedback from their colleagues?

SOCIALIZE TEAMBIRTH

TEAMBIRTH NJ COHORT 4

TeamBirth is a shared decision-making program that aims to improve safe and respectful childbirth care.

It involves a series of team huddles and other tools used during labor and delivery, to improve communication and ensure care that aligns with patient preferences.

Developed by Ariadne Labs, TeamBirth was designed to operationalize best practices in communication, teamwork, and clinical care, in collaboration with experts from the major

Looking Ahead

Today's Key Takeaways

Shared Planning Tool: TEAM

- State a TeamBirth huddle is happening and ensure the patient knows what huddles are
- Ensure everyone including the patient and support person is included and introduced
- Promote each team member to establish psychological safety

Build Your Team

- Ensure you have champions for all members of the care team

Socialize Culture Change

- Review TeamBirth resources
- Review your Cohort Resource page

Action Items
